CYCLONE MAXI

From C.C Technology Srl , here is "Cyclone Maxi", a first-class industrial steam cleaning equipment, the professional alternative to traditional cleaning systems. Conceived as a powerful 10-bar tool for a variety of highly demanding industrial environments and applications. Available in a range of models (9/13.5/18 kW max. rating), Cyclone Maxi has a stainless steel body and boiler and a complete set of sturdy accessories. To make it even more complete, its performance has been recently upgraded with the addition of the intake function, an optional of sure value and interest. Marking: CE - PED.

COMAC

CA BACK: THE NEW COMAC'S BACKPACK VACUUM CLEANER

CA BACK is the new Comac's backpack vacuum cleaner, to wear like a backpack and take the clean everywhere. Powerful and handy, it can clean even the most difficult to reach areas, always ensuring excellent performance. Thanks to the compact design and the comfortable adjustable straps, it can easily fit on anyone, leaving the operator free to move in any direction. Ideal for a use in small and medium-sized environments such as trains, boats, airplanes, cinemas, theatres, stairs, offices, hotels and accommodation facilities, thanks to the low sound pressure level, it is perfect to work even in the presence of people. Available in the electric version with cable power supply and in the battery version, for freely cleaning even areas without electricity. CA BACK equipped with a lithium battery can work continuously for 60 minutes, moreover the possibility to make partial charging without waiting the complete discharge makes the vacuum cleaner performing during each use. Powerful and handy, CA

BACK is able to become the perfect ally for daily cleaning operations. The versatility and performance of these professional vacuum cleaners make them suitable for cleaning contractors, demanding applications and rental in public environments, in the HoReCa, Well-being & Sports sectors.

COMAC

CM MINI ORBITAL: THE EFFECTIVENESS OF AN ORBITAL SINGLE DISC MACHINE CAN GO ANYWHERE

CM Mini Orbital is the most compact orbital single disc machine in Comac's range, allowing orbital technology to be exploited even in small, hard-to-reach spaces. It is the professional solution for cleaning, scrubbing, polishing and finishing edges and corners, steps, skirting boards and all small spaces. The CM Orbital Mini's oscillating head adapts to all surfaces and works effectively even on uneven floors, reducing the effort for the user to a minimum. This "mini" single disc machine also offers excellent stability and manoeuvrability and a frame that's robust and compact but also easy to transport so you can use it anywhere. Available with both cable and battery power, CM Mini Orbital is the ideal solution for cleaning, heavy-duty maintenance and finishing on marble, stoneware, cement, terracotta, resin, parquet and wood floors. Extremely versatile, this

ultra-compact single disc machine is chosen by cleaning contractors and is perfect for working in environments in the health, public and HoReCa sectors and large-scale retailing.

COMAC

NEW CS700 AND CS800: VERSATILE, COMFORTABLE, BUT EXTREMELY ROBUST SWEEPERS

CS700 and CS800 are part of a range of ride-on sweepers devised to offer maximum user-friendliness and great comfort for the operator. Extremely robust and reliable, CS700 and CS800 were designed to offer great productivity and effective, affordable cleaning.

CS700 and CS800 are available battery-powered or with gasoline-engine, and with two different working widths to meet all cleaning requirements. Extremely effective also in the presence of coarse dirt, the sweepers are suitable for cleaning indoor and outdoor areas in industrial environments, warehouses, shopping areas, car parks and in the public, automotive and transport sectors.

www.comac.it

COMAC

C120: THE NEW COMAC'S INDUSTRIAL FLOOR SCRUBBER

C120 is the new Comac ride-on industrial floor scrubber, fully equipped for every cleaning task. Designed around the needs of those who use it, C120 is suitable for use in logistics and industrial context, stations, airports and shopping centers. Characterized by a robust design and an intelligent soul, C120 is unique thanks to the sweeping-scrubbing system as well: it consists of a pre sweeping unit with side brushes and two cylindrical brushes, followed by a scrubbing unit with three disc brushes. Available in two different configurations, Essential, for the easiest cleaning operations and Bright to guarantee high performances combined with the maximum levels of existing technology, this allows the operator to choose the perfect configuration for his cleaning requirements. C120 is equipped with front and rear LED lights as standard, to ensure maximum visibility during the work. The innovative design incorporates the latest generation technologies, that allow the floor scrubber to respect the environment and reduce waste. Thanks to the CFC - Comac Fleet Care technology, you can also control the status of the machines that make up the fleet, if they are in use and by whom, to intervene promptly in case of need, reducing maintenance time and costs.

www.comac.it

COMAC

CI C20: THE PROFESSIONAL SINGLE-PHASE PRESSURE WASHER WITH A ROBUST, APPEALING DESIGN

The CI C20 single-phase cold pressure washer stands out for its appealing, robust design. Featuring compact dimensions and extreme manoeuvrability, it moves easily, even around obstacles or on stairs. The CI C20 is a high-pressure washer that is extremely manoeuvrable and easy to use. Its innovative V-shaped handlebars are wide and ergonomic to facilitate grip during use. High performing and powerful, the CI C20 is a professional pressure washer suited to working in even the most stressful conditions for long periods. Thanks to its high pressure and notable flow rate, this high-pressure washer can best satisfy the cleaning needs of the automotive, industrial, logistics and handicraft sectors.

www.comac.it

COMAC

SELFY: YOUR NEW SMART COLLABORATIVE CLEANING PARTNER!

SELFY is our cleaning concept of the future, designed to support an extremely simple and safe collaboration between the floor scrubber and its user. SELFY is a collaborative cleaning machine that combines performance and productivity to take your cleaning operations to the next level. Thanks to its simple and intuitive interface, it is also extremely easy to set up. This is the reason why you can teach SELFY the cleaning tasks even if you don't have coding skills. It has excellent navigation; movements are light and graceful. The lithium batteries are maintenance-free, and they allow SELFY to work continuously for more than one hour, ensuring always massive performances.

www.comac.it

COMET

CPS 50

A very compact scrubbing machine suitable to work for the maintenance cleaning of limited-size areas (up to 1500 mq.). Since 1959, the year of Comet foundation in Reggio Emilia - Italy, we have received and repaid the confidence of all those customers who wished to entrust us with increasingly more ambitious projects. We started by manufacturing pumps for the treatment of crops in the agricultural sector and then, in the following decades, we began specializing in other areas. Today our company operates in three key sectors, two dedicated to components and one to finished products: Agriculture, Industry and Cleaning.

www.comet-spa.com

LAVORWASH

SMALL AND VERSATILE SCRUBBER DRIER

DART 36, the new addition to Lavor's extensive scrubber drier range, is designed to provide a solid, reliable, very agile and accessible tool to keep your floor clean and dry. This small yet versatile machine is ideally suited for floors up to 1200sqm, giving you an effective alternative for cleaning gyms, car showrooms, retail units, hospitals and schools. The DART has many features including: narrow body design, automatic brush attachment and brush discharge, easy removable dirty water tank with a large inspection window for simple maintenance and clean out and large non-marking wheels. Lavor said: "The new Dart is an affordable alternative to cleaner floors. Only one switch and you are ready to work, no lever or setting to take care of: flow across a narrow path or congested area with best visibility and cleaning hard to reach edges on both sides of the brush. "Forget squeegee corners or turns nightmares with a compact and neckless driving wheel. Reduce unproductive breaks with an automatic solution cut-off, brush (dis) connection and water stop filling."

PULIMEC

PARTNER FOR THE THOROUGH CLEANING

PuliMec is your partner for the thorough cleaning of any type of surface and space in any sector: commercial, ho.re.ca, hotellerie, health, construction, industrial and more. Hygiene is the starting point for PuliMec, to reach a state of well-being for all. PuliMec wants to offer state-of-the-art machinery, products, high efficiency, high performance, versatile, which reduce waste and which respect the environmental sustainability and the health of workers and guests. PuliMec offers high-performance machines and detergents that reduce waste and facilitate the work of those who use them. Using simple, comfortable, flexible and high-performance machinery with safe and highly effective products means having our guests and our employees at heart. It means guaranteeing yourself an always energetic, fast, happy and productive staff. Reliability and performance improve, resulting in economic savings and spaces are always welcoming and clean. Guests will always feel at ease and the reputation of your facilities will be guaranteed.

**PuliMec**
DAL 1973 UN MONDO PIÙ PULITO.www.pulimecshop.com

SOLUZIONE OZONO

OZONO [O₃]

The ideal sanitation solution?

Sure! More and more people are abandoning the use of chemicals, causing allergies and many contraindications for people and the environment. The use of ozone is presented as a valid alternative, regulated by the laws.

It is therefore classified as "natural sterilization" for environment and surfaces (with protocol 24482 of 1996) in Italy and as a "GRAS" safe agent in the United States ...

Ozone is the alternative that respects you and the environment around you, protecting you from parasites and micro-organisms.

www.soluzioneozono.it

STI

COMBY 9000

Comby 9000 is an extraordinarily powerful three-phase steam generator.

It operates at a pressure of 10 bar without any loss of performance during use: thanks to its steam at 185°C, it can eliminate 99% of bacteria in just a few seconds and with the powerful vacuum motor it can perfectly dry any surface. Comby 9000 is an innovative machine and proves to be your best ally even for the longest and most difficult operations. To make it even more complete there are also the hydrojet and detergent functions: the new software will allow you to choose the level of water and/or detergent to be sprayed with steam."

www.stindustry.eu/en-gb

TISSOR

MEDICAL ROOM OXY S2 SYSTEM

Deodorization, decontamination and environmental prevention, by dry system with the use of natural gases (oxygen, ozone, nitrogen, carbon dioxide). A very effective mixture for maximum hygiene and sanitation of the environments.

Controlled dosing is the only method that can guarantee the exact application of university guidelines and protocols, and that allows to certify the treatment performed. Through PC it is possible to view and print the graphs and details of the entire environmental treatment. Single European DUAL-TARGET process.

Essecinque offers all the articles of cotton and other textile fibers with the related equipment.

Passion for cleaning.

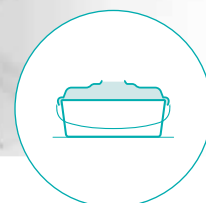

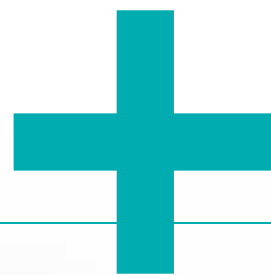

www.essecinque.net

made in Italy

How **hygienic** is your cleaning process?

TTS ensures **maximum hygiene**. From start to finish.

Soak on demand
adjusting the cleaning solution

Using one clean mop per area,
soaking it just before actual use, is the first step
in preventing cross-contamination.

Pockety

Detach the flat mop without contact
with dirt, viruses and bacteria

Avoiding hand contact with dirt
when disposing of mops is the next step to take to avoid
the dangerous spread of viruses and bacteria.

ESSECINQUE

FLAT MOP, COTTON AND MICROFIBER, HOOK AND LOOP FASTENING SYSTEM

This flat mop allows a perfect and without stains cleaning thanks to the particular interweaving between Microfiber and Cotton. Microfiber effectively removes dirt and dust, at the same time the cotton allows the product to maintain the right humidity, keeping the mop wet for longer and allowing it to clean several meters of surface.

The hook and loop fastening system ensures a perfect fit to the frame, reaching every corner, and the user can easily replace the mop in order to wash it.

In the catalog also the only Microfiber version, without the cotton, for a more traditional use of this kind of mop.

Sizes: 45 cm, 60 cm (possibility of other sizes on request).

www.essecinque.net

PARODI & PARODI

DOK INOX

Parodi & Parodi is specialized, since it was born in 1959, in producing industrial pads for floor cleaning and maintenance.

Our experience taught us how to keep marble brilliant for long. So, we created a line of pads, in steel wool and stainless steel wool. They are suitable for medium and high speeds and for delicate floors.

Our pads are regularly distributed all over Italy and abroad and they can meet your specific exigencies.

www.parodieparodi.it/en

REFLEXX

REFLEXX GLOVES

Reflexx is Italian leading company distributing throughout Europe disposable Latex, Nitrile, Vinyl, Polyethylene and Household gloves. The Reflexx branded gloves are manufactured with superior elasticity for great sensitiveness thanks to high technology plants and a thorough deep selection of raw materials. Reflexx gloves comply with different regulations related to Medical Devices, Personal Protection Equipment and Food Contact Materials in order to guarantee high quality, high resistance and top safety.

www.reflexx.com/en

TTS

THE PERFECT CLEANING PROCESS

Dosely together with Pockety make the entire cleaning process highly hygienic, from start to finish.

Dosely enables you to use a clean mop for each area to be cleaned, soaking it shortly before actual use. The cleaning solution is contained in an hermetic tank that preserves the active principles and can be adjusted from 50 to 350 ml, ensuring optimal moisture saturation for every type of mop and every size of surface to be cleaned.

Pockety unhooks mops without contact with dirt, viruses and bacteria and collects them directly in the bucket. It is suitable to be used with the range of TTS mops with pockets, both washable and disposable, allowing the operator to use the appropriate mop for the type of surface to be treated and the degree of dirt.

www.ttsystem.com

TTS

DESIGNED TO AMAZE YOU

Wiz is the unique plate wringer that wrings out 10 to 20% more than traditional wringers, quickly eliminating all excess water and reducing floor drying time.

Its adjustment system allows four different wringing levels to be set, changing the moisture level as required and keeping it constant with each wringing.

The result is no longer dependent on the strength of the operator, who simply has to guide the lever to the end of the stroke, without being forced to repeat the operation several times. Whatever flat mops are used or the wringing intensity set, Wiz always requires half the effort compared to conventional wringers, reducing the risk of muscle pain: field tests show a reduction in effort ranging from 50 to 70 per cent, resulting in less fatigue.

www.ttsystem.com

TTS

THE COMPACT CLEANERS TROLLEY WITH GREAT FEATURES

Nickita is a cleaning trolley that can be equipped with either two 15 or 25 litre buckets, resulting in a 50 litre configuration for large spaces or a smaller 30 litre configuration.

Nickita is available with Wiz, the plate wringer that wrings out 10 to 20% more than conventional wringers, reducing the effort required from 50 to 70%. Wiz also stands out for its adjustment system that allows four different wringing intensities to be set.

Thanks to Lampo it is possible to equip Nickita with everything needed for cleaning, turning it into a complete workstation. The innovative quick-release system enables operators to carry any tools their protocol prescribes and quickly switch from one tool to another using always the same handle.

www.ttsystem.com

TTS

YOUR GLASS WILL SHINE TWICE AS BRIGHT

TTS has a clear mission on glass and polished surfaces: make them shine, without wasting time or energy. Glass Line is designed to cover every step, from washing to drying and removing stubborn dirt.

It also makes high and hard to reach areas easier to clean, since every tool features the Lampo attachment for instant connection to handles or extension poles. With Jack Angled, the working angle can be adjusted freely to simplify operations and bypass obstacles. In the range, plastic window squeegees stand out: a light press on the lever releases the blade for quick replacement, while a stronger press opens the channel with 30% less effort than traditional squeegees.

The swivel head version can be left free to move or locked at a chosen angle.

ARCO CHIMICA

THE BIO GREEN LINE

The Bio Green line is an absolute novelty from Arco Chimica. On the occasion of the company's 30th anniversary, we have studied a range of completely natural, biodegradable and effective detergents. A unique and innovative biological formulation that contains probiotic bacterial strains and highly biodegradable cleaning agents. The Bio Green Line is a concentrate of advantages from the union between probiotics and green chemistry.

- Increased cleaning performance
- Neutralization of bad smells
- Prevention of biofilm formation
- Continuous degradation of organic residues
- Based on biodegradable perfumes
- Completely natural, biodegradable and effective formulas
- Based on probiotic bacterial strains and highly biodegradable cleaning agents.

It is possible to boast immediate and constant advantages for surfaces and the environment since Bio Green detergents guarantee effective and high-performance cleaning on surfaces thanks to the reactivation of bacillus spores with the subsequent wash. No danger for use, storage and transport as these are detergents that do not have dangerous labels for humans and the environment. The entire range is also available in mono-fragrance. Send an e-mail to info@arcochimica.it to find out more.

www.arcochimica.it

BETTARI

FOAM CLEANER FOR FOOD GREASE AND CARBONIZED RESIDUES

High-performance alkaline foam cleaner designed to remove stubborn organic soils such as animal fats, carbonized residues, protein deposits and heavy grease. For professional use in food environments, ensuring fast and effective cleaning in compliance with HACCP standards. Also suitable for daily and periodic deep-cleaning operations in professional kitchens.

Thanks to its formulation, it penetrates deeply into dirt layers and dissolves even the most resistant burnt-on residues without intensive scrubbing. Applied via spray, it forms a dense clinging foam that adheres to vertical and inclined surfaces, extending contact time and improving efficiency. It reduces manual effort and improves operational efficiency.

Ideal for ovens, grills, cooking plates, hobs, stainless steel hoods, worktops, equipment, floors and walls, it removes grease and carbonized dirt while reducing cleaning time and effort. High alkalinity ensures rapid action, optimizing time and energy consumption.

Can also be used by immersion for deep cleaning of heavily soiled components and persistent greasy stains. Suitable for kitchen use and removal of heavy grease and sludge in workshops and garages.

Powerful yet efficient, it is the professional solution for demanding cleaning tasks where hygiene, speed and degreasing performance are essential. Ensuring consistent results even on the most difficult residues.

www.bettari.it

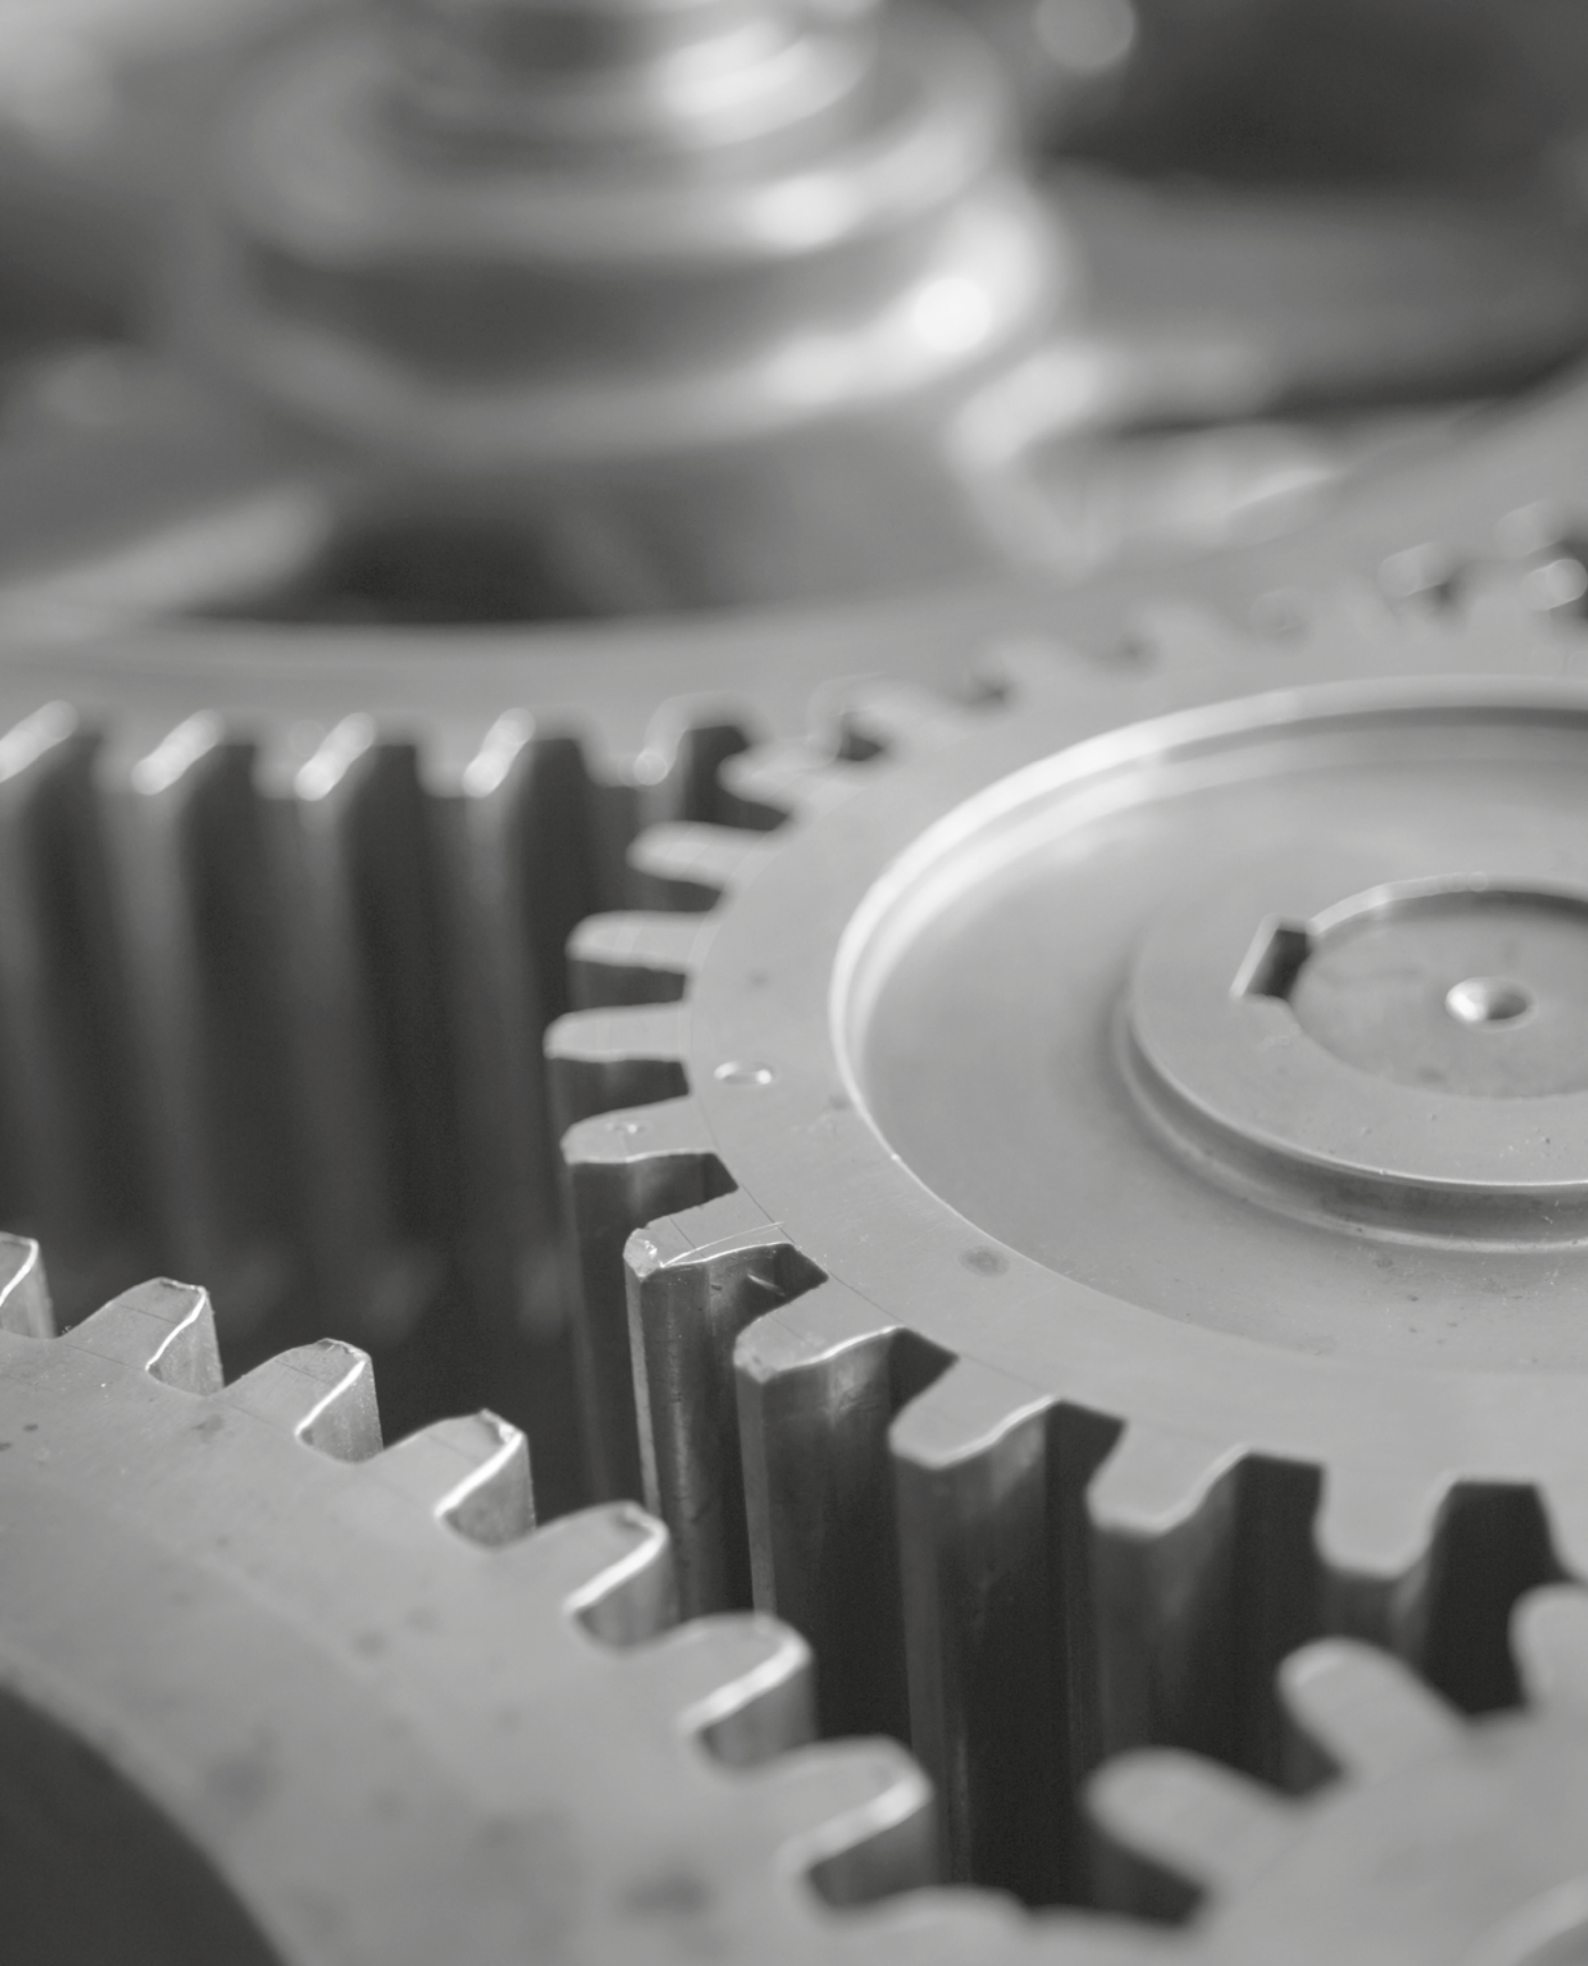

ORMA

FLIES, MOSQUITOES, AIR HYGIENE: THERE IS A SINGLE SOLUTION

To support the effective management of comfort in everyday environments, within its Hygiene line, Orma offers a unique and innovative solution for the control, well-being, and hygiene of almost all types of enclosed spaces. This is the Air Control System, the automatic aerosol diffuser that presents itself in the market as a revolution in instant air control. When used with different spray cans, it becomes an instant insecticide, an environment disinfectant, and more generally, an air freshener. Restaurants, bars, hotels, as well as offices, gyms, and public places, can finally free themselves from problems caused by insects like flies and mosquitoes in a simple and immediate way with the Air Control System. This guarantees their customers the highest level of tranquility and serenity, as well as air hygiene. Thanks to its three dispensing intervals, the Air Control System is the simple and convenient solution to always offer the excellence of air quality in everyday spaces.

UDOR

DIAPHRAGM PUMPS AND PLUNGER PUMPS

Udor was founded in 1966 and today it develops, manufactures, supplies and services Diaphragm Pumps and Plunger Pumps for pumping water, including chemical-added water, designed for various industries, from Agriculture to Washing, from Firefighting to Lawn care. Today, our production covers over 50 models of Diaphragm Pumps and over 150 models of Plunger Pumps. Our pumps are designed to ensure reliability and long life and we are continuously committed to improve our products to keep ensuring higher performances and quality: our pumps can be incorporated into various types of pumping systems.

PROTECTION BARRIER FOR PHOTOVOLTAIC

Protection barrier for photovoltaic: panels in aluminum, which allows to protect the part underneath the photovoltaic panels from nesting or standing. The barrier is applied on panels installed in industrial buildings and on roofs of civil buildings (roofs made with tiles).

The installation is very simple and consists in fixing the gridded part with silicone glue and/or fixed with the Screw Kit for Hooking directly on the side of the panel.

The brick-colored lead strip must then be shaped by hand following the line of the roof (tiles, tiles, laminate), so as to close completely.

eurodif.it

ORMA

FLIES, MOSQUITOES, AIR HYGIENE: THERE IS A SINGLE SOLUTION

To support the effective management of comfort in everyday environments, within its Hygiene line, Orma offers a unique and innovative solution for the control, well-being, and hygiene of almost all types of enclosed spaces. This is the Air Control System, the automatic aerosol diffuser that presents itself in the market as a revolution in instant air control. When used with different spray cans, it becomes an instant insecticide, an environment disinfectant, and more generally, an air freshener.

Restaurants, bars, hotels, as well as offices, gyms, and public places, can finally free themselves from problems caused by insects like flies and mosquitoes in a simple and immediate way with the Air Control System. This guarantees their customers the highest level of tranquility and serenity, as well as air hygiene.

Thanks to its three dispensing intervals, the Air Control System is the simple and convenient solution to always offer the excellence of air quality in everyday spaces.
